**Postdoc Position in Dr. Chakravarti’s Lab**
Link to Apply: [https://utoledo.csod.com/ux/ats/careersite/6/home?c=utoledo](https://utoledo.csod.com/ux/ats/careersite/6/home?c=utoledo)
Position Number: 2490
Position Description:
This Postdoctoral Fellow will be primarily responsible for designing and conducting experiments related to our research focus of autoimmune diseases. The research requires a broad knowledge and distinctive skill set in immunology and biochemistry that will be important to carry out the goals and specific aims of different collaborative projects. This includes emphasis on the techniques including flow cytometry, ELISA, RT-qPCR, cell culture and molecular cloning. Knowledge of breeding and maintaining a rat colony for various disease models is desirable. Eligible person is expected to participate in weekly group meetings and write manuscripts for publications under the supervision of the PI.

**Research Associate Position**
Link to Apply: [https://utoledo.csod.com/ux/ats/careersite/6/home?c=utoledo](https://utoledo.csod.com/ux/ats/careersite/6/home?c=utoledo)
Position Number: 2451
Position Description:
This Research Associate will be primarily responsible for designing and conducting experiments within University of Toledo Microbiome Consortium, a core facility for metagenomics and metatranscripomics. The main work of this individual is to serve as a core manager of the sequencing and other bioinformatics services of the Center to members within and outside the UT.
