Administrative

Welcome/The University of Toledo Accreditation

Welcome to the EMS Education Program at the University of Toledo. This program is accredited to conduct EMS training classes through the Ohio Division of EMS (ODPS Accreditation #322) and CoAEMSP 600786. Accreditation ensures that all training programs are in compliance with state and national regulations. The Program reserves the right to modify this manual as well as any syllabus and schedule as necessary and at any time. If modifications are made, the students will be provided with written documentation.

The University of Toledo does not discriminate in its employment practices or in its educational programs or activities based on sex/gender, race, color, religion, age, disability, or national origin. For more specific information, students may review the University’s policies: 3364-50-02 (Nondiscrimination) and 3364-50-03 (statement on non-discrimination on the Basis of disability-Americans with Disabilities Compliance). The University of Toledo also prohibits retaliation against any person opposing discrimination or participating in any discrimination investigation or complaint process internally or externally. Reports of sexual harassment and discrimination questions regarding Title IX, and concerns about noncompliance should be directed to the Title IX Coordinator. For a complete copy of the policy or for more information, please contact the Title IX Coordinator [https://www.utoledo.edu/title-ix/] or the Assistant Secretary of Education within the Office for Civil Rights (OCR) [http://www.ed.gov/ocr].

Administrative Contact Information

Complaints or notice of alleged Title IX policy violations, or inquiries about or concerns regarding Title IX policy and procedures, may be made internally to:

Vicky Kulicke, Director Title IX and Compliance & Title IX Coordinator
Office of Title IX and Compliance
2801 W. Bancroft St.
Toledo, OH 43606-3390
Snyder Memorial Hall 1120
(419) 530-4191
titleix@utoledo.edu
[https://www.utoledo.edu/title-ix/]

Inquiries may be made externally to:

A person may also file a complaint with the appropriate federal, state, or local agency within the time frame required by law. Depending upon the nature of the complaint, the appropriate agency may be the federal Equal Employment Opportunity Commission (EEOC), Office for Civil Rights (OCR) of the U.S. Department of Education, the Department of Justice:

Office for Civil Rights (OCR)
U.S. Department of Education
400 Maryland Avenue, SW
Washington, D.C. 20202-1100
Customer Service Hotline #: (800) 421-3481
EMS EDUCATION PROGRAM - ACCREDITATION STATUS

At its meeting on July 24, 2019, the Board of Directors of the Commission on Accreditation of Allied Health Education Programs (CAAHEP) granted initial accreditation to the EMS Paramedic program at the University of Toledo in Ohio. The CAAHEP Board acted upon the accreditation recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP). Through the accreditation process, which includes a thorough review of the program, curriculum, resources, faculty and staff, as well as a site visit of the program, the EMS Paramedic program at the University of Toledo was determined to be in substantial compliance with the nationally approved Standards and Guidelines for educational programs as established by the EMS Paramedic profession.

CAAHEP accredits more than 2,200 educational programs that prepare health professionals in 32 different disciplines. Accreditation is one step in a process that is meant to protect the public and ensure a supply of qualified health care professionals. For more information about CAAHEP and accreditation, visit www.caahep.org.

Program Structure/Academic Credits

All lectures and testing will be conducted online via Blackboard and JB learning online. This is a blended program with online didactics and in-person skills labs and clinicals. Portions of the education include skill labs, clinical hours, and field internship. Labs are designed to promote the learning and application of clinical skills. Clinical rotations will be at various hospitals with the intent of exposing students to real patients for development of skills under the guidance of a preceptor. Field Internships will be performed with local EMS agencies and are designed to be a capstone of the educational process.

At the beginning of each course, students will be provided with a course syllabus. The syllabus includes a schedule of classes, assignments, grading criteria, and completion requirements. Since a tremendous amount of information is presented in all courses, students must come to class prepared to discuss and expand upon assigned reading material.
Classroom and laboratory sessions will include instruction in material that expands and enhances the information presented in the textbook. Course exams will include content from the textbook, handouts, lectures, Blackboard activity, skill lab procedures and documents, as well as any other sources that are used or referenced in the program.

The goals of this EMS Program are to provide each student with the opportunity to:

- Obtain a broadened level of EMS education consistent with national education trends and the national standard curricula
- Provide opportunities for enhanced education through simulation, cadavers, and other forms of advanced technology that is available through The University of Toledo’s resources
- Attain National Registry certification as a Basic Emergency Medical Technician
- Attain Ohio EMS certification upon successful completion of the program and Ohio Division of EMS certification requirements
- Develop skills, knowledge, and critical thinking which will enable each student to become a competent entry level Emergency Medical Technician.

The program helps to prepare students to take the National Registry Certification Exam to become an EMT-B. Students who pass the National Registry Exam are eligible to apply to the Ohio Division of EMS for Ohio certification. In order to work in the State of Ohio, one must be certified by the Ohio Division of EMS. However, it must be clear that successful completion of the course does not guarantee passing results or certification.

Office Hours/Faculty/Administration

All classroom activity, unless otherwise instructed, will be online. Skill sessions and labs will be held in our department in Collier as well as at the Interprofessional Immersive Simulation Center on the Health Science campus. Faculty are always available on class days to meet with students. Office hours and days will vary on non-class days, so students are encouraged to make advance arrangements if it is necessary to meet on a non-class day. The following are key personnel for the administration and delivery of your education:

The University of Toledo Program Administration:

Jeffrey Schneiderman, Program Director
Office: (419) 383-1705  jeffrey.schneiderman@utoledo.edu

Kristopher Brickman, MD, Medical Director
Office: (419) 383-6383  kris.brickman@utoledo.edu

Daniel Kemple, MD, Assistant Program Director
Office: (419) 383-1705  dankemple@gmail.com

Ione Kampfer, Administrative Assistant/Clinical Coordinator
Office: (419) 383-5282  ione.kampfertreen@utoledo.edu
Course Cost and Associated Fees (As of 7/2021)

Current students taking Basic EMT as an elective are charged the typical amount for the course which is charged at UT CH rates. The Basic EMT course is a 7 CH course over 2 semesters. Other requirements of the students to purchase includes a nominal charge for student polo shirt. Course materials as of 7/2021 are $262.00 via JB Learning. Background checks and National Registry testing fees is the student’s responsibility.

External students only seeking to take this course as a certification the costs is $1575 which includes didactic material, program polo shirt, CPR certification, lab and application fees. Background check, ID and parking not included.

Course Delivery

This course is delivered as a blended learning course with online didactics, discussion boards, chapter quizzes and other electronic content. The skills labs are in-person as is any clinical rotation requirements. It is expected that the student reviews the information included in the syllabus for that specific week for instruction and participates in the online discussion boards. Attendance will be taken in a variety of ways including reviewing online times in blackboard and JB learning, completion of chapter quizzes and reviewing discussion board posts. If it is found that there has not been activity for that week, the student will be held accountable for the lost hours and amount of time and is required to complete for full credit of hours for the specific week.

Skill sessions are MANDATORY for all students. They are held on Wednesdays 8am-12pm OR Thursdays 12pm-4pm every other week in COB 0307 and are listed in the syllabus.

Academic requirements for online learning

Risk Management Plan:

Information technology is an integral part of how the university carries out its mission. The university is committed to ensuring that vital technology resources and information stores are appropriately prepared to support recovery and business resumption efforts following accidental deletion, system corruption, and/or physical loss or damage. The University of Toledo policy number 3364-65-09 addresses Technology backup, disaster Readiness and Recovery policy.

Access of information: The University of Toledo Department of EMS Education will maintain accountability to provide access for audit purposes to verify compliance with state and other accreditation rules.

Minimum Technology Requirements:

Chromebooks, Android devices, and iPads are NOT recommended for students to use as their primary device. Certain programs for classes (testing software, plug-ins, etc.) will not work on
these devices. We strongly recommend that you buy or bring a Windows PC (Windows 10) or Apple Mac device (Mac OS 10.14 or higher) to be used for school.

Students will need to have access to a properly functioning computer and high-speed Internet access throughout the semester. The rental/purchase, installation and maintenance of required computer hardware and software is the responsibility of the student. Student computers need to be capable of running the latest versions of plug-ins, recent software and have the necessary tools to be kept free of viruses and spyware. Students may access UT's Virtual Computer Lab (VLab) from their computers (remotely) and use software in the library:

UT's Virtual Computer Lab (VLab) is accessible from your computer and may have all the software you need, read more about VLab

Most on-campus computer labs are also capable of accommodating online courses, but students should check specific lab information with the IT Helpdesk (419-530-2400).
Some courses still require specific software that students may have to purchase -- read the course syllabus carefully.

**Software**

The University participates in several programs that provide lower cost software for student purchase. For more information visit the IT page or contact the IT Helpdesk, 419-530-2400 24 hours a day.

**Use of Public Computers**

If using a public library, or other public access computer, students should check to ensure they will have access for the length of time required to complete their tasks and tests.

**Online Procedures for course completion:**

The Program Director maintains accountability to ensure the online course work is completed and documented. Weekly, the Program Director reviews the submissions, grades as appropriate and comments and participates in the discussion board sessions.

**Method to Transition from online to in-person courses:**

The department of EMS Education seeks approval and advice from the EMS Board. During COVID, the courses were transitioned to online mid-course and proved to be very cumbersome. Moving forward, the department of EMS Education plans to continue with “blended” learning for the foreseeable future. Recent research has shown that the blended delivery model may be superior as compared to the in-person model and higher first-time pass rates on the National Registry exams is the proof. IF the department is considering reverting, the EMS board would be included in that decision and the return to in-person course will not occur mid-course and only at the beginning of a new course.

**Technology Infrastructure:**

Between the two online Learning management Systems (LMS) this course will utilize (Blackboard and JB Learning) requires user identification, codes, and other special requirements that the student will acquire to complete coursework. This includes user identification, authentication, and authorization procedures. Access to the online content can only be viewed by the student, the Program Director, and other authorized entities only for the purpose of accreditation review after a request for authorization has been submitted to the EMS education department.
Classroom and Conduct Policies

Acknowledgement of Program Policies
Each student is required to sign a student contract acknowledging that he/she has read, understood, and agreed to abide by all program and university policies, procedures, academic and behavioral guidelines. If a student has any questions or concerns regarding the course or its policies, he/she should first discuss the questions or concerns with faculty. If clarification is not obtained satisfactorily, then the student may directly contact program administration.

Requests for exemptions from or substantive changes in course policies should be presented in writing by first submitting it to faculty. Requests will be forwarded to the program administration for review.

Professional Behavior
Being a part of the EMS field demands professionalism. The following guidelines are expected to be followed. The student will not be permitted to remain in the program if adherence to these expectations is not maintained.

Conduct
- Come to classes prepared for the scheduled subject or activities. Students are given reading assignments for the class and skill sheets for the labs. Students are expected to read these materials before coming to class so they are prepared. Quizzes over material may be given at the start of the class.
- Behave in a manner that does not interrupt or disrupt classroom or laboratory activities. Examples of disruptive behavior include tardiness, leaving early, private conversations during class, sleeping in class, inappropriate or offensive behavior, defiance of or disrespect toward the instructor, ignoring the instructor’s instructions, or attempting to redirect or disrupt the orderly flow of instruction. Disruptive behavior may result in disciplinary action, which could include removal of the student from the program.
- Interact with and address all faculty, administrators, staff, and guests with appropriate respect for their position and authority. Common courtesy during communication is expected.
- All cellular phones/pagers must be turned off and stored out of site during lecture, lab, and while participating in a clinical site. In the event a student may be expecting an emergency call, prior notice must be given to the instructor and allowances may be made.
- Any student, who creates an interruption of the normal function of the university, either in or out of the classroom, may be asked to leave the area. He or she may be subject to disciplinary action.
Appearance

- Students are expected to use good judgment in their appearance, reflecting professionalism. In addition to this section, see the UTMC dress code.
- Hygiene. Personal cleanliness, including the absence of controllable body odors are expected. Perfumes and fragrances are to be kept at a minimum. Perfumes and/or cologne are prohibited in patient care environments.
- Clothing must be neat and clean with no derogatory or potentially offensive pictures or verbiage. Pants may not have holes, and no undergarments are to be exposed. Tops shall not reveal cleavage or armpits.
- Shoes must be clean and in good repair. Sandals, flip flops, or thongs are not to be worn. In the classroom, skill lab, and clinical setting the student will be exposed to needles and body fluids. Any open shoe can result in an exposure or needle stick.
- Hair must be kept clean and well-groomed. Beards/moustaches must be trimmed and neat in appearance.
- Hats/caps may not be worn during educational activities, or in any patient care environment.
- Fingernails must be clean, well-manicured, and the length appropriate for the EMS workplace and for being in patient care environments. Artificial nails are not allowed in the clinical setting since they harbor bacteria, posing a risk to patients.
- Tattoos are to be covered during educational activities and in all patient care environments.
- Jewelry. Piercings during all educational activities will be limited to the ear, with a maximum of two studs per ear. All other piercings are not to be visible, and must be covered or removed during educational activities. Necklaces and dangling jewelry of any type are prohibited in patient care environments.
- Name tags, when issued, shall be worn above the waist and the student’s name markings identifying the person as a student must be clearly visible.
- Program Shirts. Students will be required to purchase a program shirt and/or a jacket. Program shirts must be worn in both the academic setting and all patient care environments. Program shirts are also to be worn in situations where sessions will be conducted outside classroom, including the IISC (Interprofessional Immersive Simulation Center IISC), Lucas County EMS, and anywhere else the students attend during class time. For more specific information about dress and attire requirements for clinical, refer to the Clinical Policies Section.

Dishonesty

The following are examples (but not an all-inclusive list) of unacceptable behavior in terms of cheating, falsification, and academic dishonesty.

- Communication or copying in any manner with another student during the exams
- Communication in any manner with another student regarding an exam for the intent of providing assistance to that person or others
- Documenting, or in any other fashion, duplicating exam questions; this includes, but is not limited to cell phone pictures of the exam questions/info
- Unauthorized use of any materials and devices not approved for class or exams by the faculty
- Plagiarism in any form
- Falsification or invention of information or data on any documents submitted for grading

Alcohol / Substance Abuse
The University of Toledo has policies in place regarding alcohol and substance abuse (see below). However, it does not clearly address presence and participation in program-related activities while under the influence. For clarification, no student involved in any program-related activity shall be under the influence of alcohol or any other substances (legal or not) that could potentially impair the student’s mental, emotional, or physical abilities.

**VIOLATIONS OF THE DISHONESTY AND ALCOHOL/SUBSTANCE ABUSE POLICIES ARE SERIOUS OFFENSES THAT COULD LEAD TO IMMEDIATE DISMISSAL FROM THE PROGRAM**

**University Policies**

The University of Toledo maintains a uniform set of general policies and procedures for its campuses. Students are responsible for knowing where to locate policies and for being aware of expected behaviors. Violations could result in fines, and if serious enough could result in removal as a university student.

Policies can be found at the following website: [http://www.utoledo.edu/policies/](http://www.utoledo.edu/policies/). These are just a few of the policies that pertain to students in this program:

- Confidentiality of Student Records 3364-71-15
- Student Code of Conduct 3364-30-04
- Academic Dishonesty 3364-71-04
- Adding/Dropping a Class 3364–71-08
- Harassment (sexual and otherwise) 3364-50-01
- Workplace Violence 3364-60-07
- Smoke Free & Tobacco Free Policy 3364-60-01
- Alcohol & Substance Abuse Policy 3364-30-09
- UTMC Dress Code Policy 3364-25-06
- UTMC Control Policy on Hand Hygiene 3364-109-GEN-102

Parking regulations can be found at: [http://www.utoledo.edu/parking/parkingenforcement/](http://www.utoledo.edu/parking/parkingenforcement/).

**Attendance**

Attendance and active participation in class are essential components of the educational experience. All classes/labs will begin at the scheduled (or otherwise announced) time and **attendance is mandatory**. Students are expected to arrive in advance of the class/lab time. Students arriving after class/labs have started are considered “late”. Late arrivals may not be permitted to participate in the class for that day. Faculty is responsible for monitoring and documenting attendance. Students are expected to complete 168 hours of didactic learning, approximately 32 hours of in person skill labs and 10 hours of clinical/field time.

Absences will be determined excused or unexcused. Excused absences will be determined by the program administration or designate. Unexcused absences will result in disciplinary action.

Students who are absent, late, or leave early (whether excused or unexcused) must:
- Provide written explanation to the faculty that will become a part of the student file, and
- Submit a written document covering the missed topics.
• The document must be 1 page in length for each hour or fraction of an hour that was missed
• The document must contain a review of material that is satisfactory to the Medical Director or designate

Attendance is measured in different ways in our blended class environment. Discussion boards, chapter quizzes and exams are the main ways we can evaluate time is being devoted as required by accreditation standards. Another way is to evaluate “time in course” via Blackboard evaluation tools as well as JB learning tools that determines the number of hours, minutes and seconds devoted to study and course didactics.

A student who arrives after an in-class exam or quiz has started, or who is absent for that quiz/exam, shall be given a grade of “0”. The student may request a meeting with faculty and Program Administration if he/she feels an exception should be granted. The program reserves the right to deny or grant exceptions on a case-by-case basis.

**Communicating with Instructors/Addressing Concerns**
Students having questions or concerns about course material should address them first to the faculty member(s) responsible for that information. If the concern is a curriculum issue, and more clarification is needed, then the faculty/student will get clarity from the Medical Director. If the concern is policy-related and cannot be addressed satisfactorily, then the student may request clarity from program administration.

Any concerns that would require entry into the program’s grievance process must be in writing (see Grievance/Appeal Process). Documentation must be truthful and accurate statements of the circumstances that gave rise to the concerns. Falsification, misstatements, or exaggeration of facts will be cause for disciplinary action up to and including dismissal.

**Student Conferences/Assistance**
Faculty will schedule and document at least 1 conference per semester. The primary objectives of the conference are:

- **Allow the instructor to:**
  - Provide an overall evaluation of the student’s classroom and clinical performance
  - Provide the student with specific performance improvement recommendations
  - Address student concerns

- **Allow the student to:**
  - Discuss the overall evaluation of classroom and clinical performance
  - Discuss methods of performance improvement and develop a plan for improvement (if necessary)
  - Communicate course performance concerns to the instructor.

Faculty is available, simply upon request by the student, to provide additional instruction and tutoring with skills and curriculum content. If at any time a student feels overwhelmed, unsure, or in need of additional instruction during the course, he/she may approach faculty for assistance.
**Disciplinary Procedures**
Disciplinary policies are designed to direct student activity in a more positive manner, and to deter negative behavior. Most students do not face any type of discipline, but those who disregard policy and/or course expectations generally will encounter some type of discipline. Examples of cause for discipline include (but are not restricted to) breaches of the professional behavior section described earlier in this handbook. Discipline may include any of the following: a written warning, suspension, probation, or dismissal. The Program is not obligated to follow a specific progression of discipline, and has the right to issue the form of discipline it feels is warranted in relationship to the following:

- the seriousness of the offense
- whether or not offenses are repeated
- the impact on the reputation of The University of Toledo and its affiliations
- the impact on the reputation of any of the program's clinical affiliations
- the impact on the relationship between the program and its affiliations

**An infraction that is serious enough could result in immediate dismissal.**

For any action that might warrant discipline, faculty will document the action and submit it to the program administration, who will then determine if disciplinary action is warranted, and will provide documentation for the student file. Students must also be aware that some actions resulting in disciplinary action may adversely affect the status of the student’s affective domain grade. If the student requests an appeal regarding any action taken by the Program Director, the student can appeal to the program’s Medical Director regarding those actions against the student’s position in the program.

**Dismissal**
The program reserves the right to dismiss a student whose academic standing, clinical performance, or conduct does not meet program expectations. Once dismissed, the student forfeits all fees and rights to continued class/clinical participation. Again, . If the student requests an appeal regarding any action taken by the Program Director, the student can appeal to the program’s Medical Director regarding those actions against the student’s position in the program. If the student enters the appeal/grievance process, continued classroom and clinical participation may or may not be suspended (depending upon the cause of dismissal), until the issue is resolved. If the appeal is at the end of the course, the National Registry exam may not be taken until the appeal is resolved.

**Admissions Requirements**
Acceptance into The University of Toledo’s Basic EMT Certificate Program requires that the student has completed the following tasks:

All students must first and foremost be a current student of The University of Toledo. Acceptance through the University Admissions Office is a requirement before a student can be accepted into the EMS Certificate Program. Students must be at least 18 years of age or a high school student that is 17 years of age and in 12th grade in a secondary school, must turn 18 years of age before the start of clinical hours (due to insurance providers) and must be at least 18 years of age to sit for the National Registry exam.
All students must complete an electronic onboarding orientation that covers HIPPA, patient rights, confidentiality, hospital codes, etc. and meet the health screening requirements. Students are required to have a current physical, a complete immunization record and a TB test.

**Student Health Insurance Requirements and Plans**

All UToledo students are required to have health insurance. The University of Toledo has partnered with Anthem Student Advantage to provide students with medical and prescription drug coverage for the 2021-22 academic year. University of Toledo policy # 3364-40-27.

UToledo automatically enrolls the following students in the student health insurance plan and assesses a fee to your student account:

- All domestic undergraduate students registered for 6 or more credit hours per term
- All domestic graduate students registered for 6 or more credit hours per term
- All international students registered for 1 or more credit hours per term
- All students who participate in patient care and are required by their program to have health insurance

You may waive the health insurance coverage if you have coverage under another plan as long as you submit your waiver by the deadline.

If you don’t waive the insurance by the deadline, you will be enrolled in UToledo’s student medical and prescription drug insurance plan. Anthem will automatically send you relevant paperwork and an insurance card.
This student health insurance plan enrollment model is a best practice in Ohio. It has allowed UTtoledo to negotiate lower premiums with Anthem Student Advantage.

Degree-seeking domestic students taking less than 6 credit hours per term and eligible dependents of all enrolled students may voluntarily enroll in the student health insurance plan directly with Anthem Student Advantage.

**HOW TO WAIVE STUDENT HEALTH INSURANCE PLAN**

You may waive the student health insurance plan if you have medical and prescription drug coverage under another plan.

Log into the MyUT portal. Then submit a waiver request to have the premium removed from your student account at universityhealthplans.com/toledo.

The student health insurance premium will be removed from your student account as long as the waiver is received prior to the semester’s deadline.

**Waiver Deadlines**

- Fall 2021: **Sept. 13, 2021**
- Spring/Summer 2022: **Feb. 1, 2022**
- Summer 2022 (for newly enrolled UTtoledo students only): **July 1, 2022**

NOTE: Once your waiver has been accepted, it will remain on file for the 2021-22 academic year. A new waiver is needed each academic year.

**STUDENT HEALTH INSURANCE PLANS FOR 2021-22**

The student health plan administered by Anthem Student Advantage provides access to nationwide providers and in the area surrounding UTtoledo, including the University of Toledo Medical Center, University Health Center and the Student Health and Wellness Center on Health Science Campus.

UTtoledo also offers students and their dependents dental and vision insurance plans.

**Refunds of Tuition**

In accordance with the University’s policy #3364-40-19 regarding Student Fees and accounts, Students are responsible for the amount of fees and charges assessed to their student account. Each student must, each term, pay all money due the University. This includes fees billed, fines, and any other type of financial obligation. Student’s accounts and loan repayments must be kept current in order to maintain enrollment eligibility and receive University documents and services. (4) Student Refunds: Refund policies will be approved by the Board of Trustees and published in the University Finance Brochure.
Issuance of Refunds -- All University refunds will be issued to the student as the account holder through University check or authorized direct deposit to the bank account of the student’s choice (either checking or savings). PLUS loan refunds are issued to the parent who holds the loan account (borrower). Refunds will be issued according to original assessment (student level) and adjust the student account balance accordingly.

Courses canceled by the University will be refunded at 100%. All classes including seminars, workshops, and weekend courses will be refunded according to a proportionate refund policy based on the length of the course. The refund policy may not be applicable to contract courses.

Refunds - Higher Education Reauthorization Act: Federal policy requires issuance of a pro rata refund to the loan and/or grant program for students who have received a federal Title IV grant or loan, or whose parents received a PLUS loan and have dropped or withdrawn from all registered courses for a term. The pro rata refund calculation is based on the percentage of enrollment period at the time the student cancels (exits).

Student fees and accounts

Students who qualify for a medical drop or withdraw are also required to go through the pro rata calculations.

All student loans issued through the University and the repayment thereof will be made in accordance with existing federal and state regulations where applicable as well as in accordance with any restrictions or conditions as specified by the University and/or loan fund donors. The Treasurer’s Office is responsible for the collection of all fees, charges, and loans on a timely basis in accordance with existing Federal and State regulations when applicable. For those payments not made on a timely basis, the Treasurer’s Office may certify to the Attorney General of the State of Ohio pursuant to Ohio revised code 131.02 and may be collected in the manner set forth pursuant to section 113.08 of the revised code. In addition, past due balances may be assessed collection costs and may be reported to national credit agencies.

There will be a monthly late payment fee assessed in an amount per the Finance Brochure on past due UT invoices. No late fee will be assessed on the student account, for students who have applied for Federal Financial Aid (FAFSA) Title IV funds that fully cover institutional charges, and the University has received a valid response file, by the payment due date. A student with a past due balance may expect the following: a) registration for a succeeding term will not be permitted; b) a transcript will not be issued; c) a diploma will not be released; d) amounts due may be withheld from refunds, grants, awards, or other payments due from the University. The University reserves the right to drop classes for the current semester if payment arrangements have not been established. Rocket card privileges may be suspended affecting but not limited to meal plan, door access as well as Student Recreation Center privileges. Failure to pay all outstanding balances due or enter in a repayment plan may also result in eviction from on-campus housing.

Returned checks or ACH payments will be charged a fee in accordance to the Finance Brochure. The University reserves the right to disallow payment by check for up to one year for returned checks due to nonsufficient funds.

Appeal/Grievance Procedure

If a student believes that he/she has received disciplinary action or dismissal inappropriately, the following steps may be taken. The student must adhere to the following process and timelines described in this policy.

Step 1
The student shall place in writing all pertinent information that the student wishes to be considered in the appeal process. The documentation must include rationale and evidence to
support reversal of the original decision or action by the program. The request for appeal and related documentation must be received in the EMS Education Office within 5 business days from the time the student was made aware of the action or discipline that is being appealed.

- The documentation will be evaluated by the program administration and selected representatives of faculty.
- A written response will be placed in the mail or will be hand-delivered to the student within 7 full business days of when the written appeal request was first received. In the response, the student will be given specific instructions to follow regarding either the acceptance or rejection of the appeal decision.

**Step 2**
If the student decides to reject the findings of the decision in Step 1, the student shall respond in writing according to the directives and timeframes outlined in the Step 1 response.

- Within 7 business days of receiving the second appeal request, the student and program administration shall meet with a panel of individuals who are selected specifically to hear this case. Each panel member will be provided with documentation pertinent to prior decisions to this point, including all information provided by the student.
- The panel may meet with the student and the program administration either separately or together according to their discretion. The function of the panel is to determine whether or not the decision made in Step 1 of the appeal was appropriate. If it is decided that an inappropriate decision was made, the panel shall also determine a course of action.
- Within 3 business days of the hearing, a representative of the panel shall provide the Program Director with a written document with the decision and any subsequent course of action, if any. This response shall be sent to the student via certified mail. The panel’s decision is final and binding.

**GENERAL PROGRAM POLICIES**

**Academic Accommodations**
For students who have not established accommodations with the Office of Accessibility and Disability Resources and are experiencing disability access barriers or are interested in a referral to health care resources for a potential disability, please connect with the office by calling 419.530.4981 or sending an email to StudentDisability@utoledo.edu.

**Voluntary Withdrawal**
A student may elect to withdraw from the course at any time. To properly withdraw, the student must provide written documentation to the program administration explaining that he/she is voluntarily withdrawing from the class.

Any person who fails to attend class for three (3) consecutive sessions without contacting the faculty or program administration either prior to the absence or during the absence is considered to have voluntarily withdrawn.
When a student is enrolled at the University of Toledo and wishes to withdraw, the student must follow university procedures regarding adding/dropping a class. Failure to follow certain university withdrawal procedures can affect the student’s university transcript and grades.

**Leave of Absence**

When a student has conditions or situations arise that adversely affect his/her health, attendance, or ability to complete required coursework, the student should arrange a meeting with faculty and program administration to discuss the circumstances and possible alternatives. One such possibility is a Leave of Absence (LOA). The details of a LOA will be discussed individually with the student, and are based on a case-by-case analysis.

Being granted a leave of absence allows the student to remain within the program. It does NOT grant the student any exceptions or waivers to the requirements necessary to complete the program, nor does it modify the current academic standing of the student.

If a student has to miss any course-related activities as a result of an illness or injury, a physician must provide a documented release prior to the student being allowed to engage in course-related activities. The document must indicate if the release is without restrictions, or whether there are restrictions. If restrictions exist, the document must be very specific as to the activities that may not be performed. If any restrictions are deemed to be permanent and would not allow the student to meet certain performance criteria, a meeting shall be conducted involving the student, faculty, and program administration to determine a course of action.

**Incomplete Status**

The EMS program will allow a student who reaches the end of the certificate program, but has not met all clinical/field internship requirements, to continue past the end of the scheduled course dates under the following conditions:

- The student must have successfully completed all academic and psychomotor (skill) requirements within the scheduled timelines of the program, including the final comprehensive skills exam and the final comprehensive written exam.
- The student must have affective domain criteria that would be graded as “Pass” up to the point of the scheduled end of the program.
- The only deficiencies are clinical/field internship hours and/or skills, and the related documents/documentation.

If the above criteria are met, the student must submit a formal request detailing the reasons why requirements will not be completed within the scheduled timelines of the certificate program. The request should contain as much detail as possible, and it must include a request for a one-semester extension.

The request will be reviewed by faculty, the Medical Director, and the Program Director before a decision to grant an extension is determined.

- If it is determined that an extension is not warranted, the student has been unsuccessful in completing the certificate program.
- If an extension is granted, the student will be given a grade of “Incomplete” for Basic EMT. The student will be provided with a detailed document outlining the specific requirements and the timeline that must be met. All requirements must be met within the scheduled timeline, which will be the most immediate semester following. The student
will NOT be given a successful completion status unless all requirements are met, and
within the designated timeline. If granted an extension, the student may participate in the
National Registry Psychomotor Examination but is not eligible for the National Registry
Cognitive Exam until all program requirements have been met.

Social Media
In today’s world, social media and communication exists in a variety of sources. Posting and
communication through any form of social media serves a variety of purposes ranging from
entertainment to provision of public service announcements. Social media, for the purposes of
this policy, includes (but is not limited to) actual conversations, texting, transmission of
images/pictures through phones or other electronic devices, as well as social networks (such as,
but not limited to) Twitter, Instagram, Snapchat, and Facebook.

Students within this program are strictly prohibited from using any form of social media to
communicate any program-related activities or events without written permission from the UT
program administration. This includes postings that reflect any degree of negativity toward The
University of Toledo, its programs, representatives, employees, students, and affiliates.

Violation of this policy, if it results in any negative perception by recipients of such social media,
will result in dismissal from the program, in addition to any legal action that The University of
Toledo may wish to pursue.

Photography
In general, photography or taking photos via student personal cell phones is permitted.
HOWEVER, in clinical rotations and labs that include cadaveric specimens’ photography or
sharing of any images is strictly prohibited.

Student Records
For the time that a student remains in the course, the following records (at a minimum) will be
maintained:

- All application and entrance requirement forms and documents, including required
  medical documents
- Any waivers required for application or course activities
- All results of any graded activities, quizzes, and exams
- All skill evaluation forms or summaries
- All clinical documents or summaries
- Documentation of any disciplinary action
- Any accident or injury reports involving that student
- Any and all documentation of any appeal and related decisions

Upon completion of the course, The University of Toledo will create summary forms of
academic scores, skills, and clinical/field-internship related hours and skills completed. In
addition, it will maintain:

- A photocopy of the certificate of completion
- Any additional documentation that the program feels may be relevant to the student’s file
If a transcript of course work is desired, the student shall follow university procedures for requesting transcripts. In the event an appeal process is initiated by the student, the Medical Director (or his designate), Program Administration, and members of any appeal panel are provided with any information from the student’s file that is pertinent to the appeal.

All student records, including those with personal information, are kept in a room and file cabinet that has a locking mechanism. Access to the files is restricted only to the faculty and program administration. The program follows University regulations with regards to security and privacy of a students’ personal and financial information (refer back to Confidentiality of Student Records Policy 3364-71-15).

**Name and Address Changes**

Each student must keep faculty informed of the most current contact information. Faculty will update the student file to reflect changes. The student must update any of the following:

- Name changes
- Residential/mailing address
- Email address
- Phone contact number

If a student does not receive notification or information from the university due to failure to communicate changes, this will NOT excuse the student from the consequences of failing to receive the notification or information.

**Cancellation of Classes**

Occasionally, poor weather conditions have forced the cancellation or delays of classes. The EMS Program is considered a part of the Health Science Campus of The University of Toledo. In situations where it is announced by local media outlets that all of The University of Toledo has cancelled classes for a specific day, then the Basic EMT class will also be cancelled. If only the Main campus is closed, and classes are still in session on the Health Science Campus, then the Basic EMT class will be in session. If the announcement does not specify a specific campus, then consider that the entire university is affected. Announcements indicating that UTMC remains open are in reference to the hospital and hospital employees, not students. Students should subscribe to the university’s alerting system, which would notify students of a variety of situations/emergencies. Local media outlets as well would provide this information.

Students are to use their judgment regarding the appropriateness of travel. If a student determines it is not safe to travel, and decides not to attend class, that student will need to notify faculty.

**General Safety & Health/Illness & Injury Reporting**

In the majority of cases, students have no injury or significant exposure while completing the academic and patient exposure requirements of this course. However, occasionally there is an injury or exposure, and therefore a need for the following policies.

- Because of the nature of the EMS profession, during their education students may be exposed to fatal or potentially fatal disease processes of a contagious nature to high-risk toxic substances, or to other situations involving personal danger and the risk of serious
As a condition of enrollment in The University of Toledo program, students agree to abide by the terms of all university policies, and those of various clinical and field internship sites, pertaining to safety. **Students shall wear appropriate personal protective equipment including, but not limited to masks, gloves and safety glasses during any patient contact or hot zone.**

- Faculty, staff, and preceptors are responsible for the health and safety of their students. They will ensure that students comply with prescribed protocols, safety regulations, and work practices. Students will abide by all instructions provided by faculty, staff, preceptors, and clinical/field internship site personnel. Students will report unsafe or unhealthy conditions to their instructors or preceptors.

Repeated or flagrant disregard of safety policies, rules, or precautions will result in dismissal from the program.

Students are expected to ensure good physical and mental health sufficient to perform the duties of a Basic EMT student. This was verified by the submission of medical information for acceptance into the program. Neither the University of Toledo nor any of its affiliates are liable for accidents or illnesses that occur to students during scheduled school hours or activities.

The University of Toledo requires all students to be covered under a health care insurance policy and the student must provide evidence thereof. In the event a student becomes ill or is injured while in a program-related activity, the first priority is to ensure the appropriate level of emergency care for the student based upon the seriousness of the condition. All costs associated with the management of an illness or injury, even while during class-related activities, is the responsibility of the student.

Program administration must be notified within 24 hours of any injury, illness, or significant exposure.

- All students will follow the Work-Related Illness/Injury Policy (S-08-018)
- If in a clinical or field internship setting, the student must also follow any requirements of that site
- Students who are covered under an employer’s insurance program may also be expected to comply with their employer’s documentation requirements

### Curriculum Policies & Course Completion

#### Structure and Evaluation

The Basic EMT Certificate Program consists of 2 semesters (7 credit hours) of education. The Program has four (4) defined areas of evaluation. Each carries its own criteria for evaluation and successful completion. Successful completion of all areas is required for course completion. The areas are: 1) academic; 2) skills; 3) clinical/field internship; and 4) affective domain. Specific course information, objectives approved by the EMS Committee, criteria for successful completion of each semester and component as well as criteria for successful overall course completion can be found in the course syllabus.
The student who successfully completes the semester will be eligible to continue into the final segment of the certificate program. The final segment of the program consists of a final comprehensive skills exam and a final comprehensive written exam. Regardless of performance in the program at this point, each of these must be successfully completed in order to pass the certificate program and be eligible to take the State Certification Examination.

**Academic Grading**
The semester consists of lecture presentations with open discussion. The semester will also contain quizzes, Blackboard assignments, and various exams that comprise the overall semester grade. In order to pass the semester in the academic component, the student must obtain BOTH of the following: 1) a minimum of 80% for the overall semester grade, and 2) a minimum of 80% on the final comprehensive semester exam.

Students MUST have an overall grade average of 80% BEFORE being able to sit for the final exam. Students MUST also receive (at a minimum) an 80% on the final exam. IF the final grade is lower than an 80% on the final, remediation and an option to take an alternate final exam will be provided. If after the second final attempt is below 80% the student will be required to repeat the entire course before being able to sit for the National Registry exam.

**Academic/Semester Letter Grade**
The following scale will be used for this class when determining grades for all semesters:

- 100 – 93% = A
- 92 – 87% = B
- 86 – 80% = C
- 70 – 79% = D
- Below 70% = F

Theoretically, a student could obtain a letter grade of “D” in any of the 3 semesters, but it would be for purposes of a letter grade on the UT transcript. The student would not be able to proceed to the next step of the certificate program. The UT EMS Program requires a minimum of 80% (“C”) in order to progress.

Academic grading for each of the semesters will consist of the following:

**EMT-B**
The program has established 80% (C) as the minimum acceptable passing grade in which a person may progress:

- Quizzes/Assignments/Projects 15% of final grade
- Section Exams & Midterm 50% of final grade
- Final Comprehensive Semester Exam 35% of final grade

*The final score for all exams, quizzes, and the semester grade is rounded either up or down to the nearest whole number, using standard rounding procedures (0.49 or less is rounded down, and 0.5 or higher is rounded up). For example, 79.45% will be rounded down to 79% and 79.65% will be rounded up to 80%.*
When calculating the overall score for the final comprehensive semester exam, if any retest is required, both the initial and the retest scores will be averaged together.

Skills Performance
In conjunction with lectures and specific didactic material being presented online, students must attend skill labs. Skills proficiency is developed during these hands-on laboratory sessions that include periodic simulation sessions at the Interprofessional Immersive Simulation Center (IISC). Following a demonstration of proficiency, students may begin to perform skills in the clinical and EMS environments.

Skills will be introduced and evaluated using the following progressive steps:

- Skills are introduced and practiced in a controlled lab setting
- Skills are evaluated for proficiency before entering into the clinical setting
- Selected skills are evaluated near the end of the EMT Certificate Program in the final comprehensive skills exam

Skills performance is given a “Pass/Fail” grade. Using standardized skill sheets with a point system, students must obtain a specific minimum score. Each skill sheet also has a list of “critical criteria” that must be satisfactorily met. The combination of obtaining the minimum score along with meeting critical criteria requirements results in a “Pass” for that specific skill.

At the end of the semester, selected skills are evaluated using the same criteria. The student must obtain a “passing” score on each skill in order to progress to the next segment of the program. If a student does not obtain a passing score on all of the designated skills, the student has one opportunity to retest any necessary skills. The student must attend a remediation session prior to any retesting of skills.

Clinical and Field Internship
During the Basic EMT course, students will attend designated hospital areas and will ride on designated EMS squads for the purpose of integrating the knowledge and skills learned in the classroom and lab settings into situations with real patients under the direct supervision of a preceptor. A total of 10 hours is required. Clinical rotation forms will be provided to the students prior to being assigned to any clinical rotations. Documentation showing hours present for the clinical rotations must be signed by a preceptor before leaving every clinical shift. This component is graded on a “Pass/Fail” basis. Provided the student has met all clinical and field internship requirements, and has no uncorrected issues addressed through evaluations or preceptor feedback, the students shall be given a grade of “Pass”. More specific detail regarding the areas, hours, specific skill, and documentation requirements are outlined in the clinical and field internship segments of the Program Handbook.

Affective Domain
The affective domain is evaluated in all aspects of the program in various ways. This component is ongoing and is not restricted to a specific semester grade. It is graded on a “Pass/Fail” basis.

The following methods are used to evaluate the affective domain:
Classroom Environment:
Affective domain areas that are evaluated in the classroom environment include, but may not be limited to: integrity, self-motivation, appearance, attendance, time management, Blackboard interaction, and respect. This is based upon the following point system. A student begins with a total of 100 points. When the score falls below 80 points at any time throughout the certificate program, the student will be required to meet with his/her advisor and the Medical Director to develop a corrective action plan.

- Unexcused Absent Entire Day 5.0 pts
- Unexcused Absent Half-day 2.5 pts
- Unexcused Late 0 – 15 minutes 1.0 pt
  15 – 30 minutes 1.5 pts
- Lack of Class Participation 2.5 pts
- Missed Assignments 5.0 pts
- Late Assignments 2.5 pts
- Violations of Dress Code 2.5 pts
- Violations of any other Classroom Behavioral Items 5.0 pts
- Lack of Professionalism in dealing with patients, simulated patients, faculty, or UT staff in the classroom, field/clinical experience or lab 5.0 pts

Skills Development/Performance:
Each skill form has line items addressing affective domain. Affective domain areas that are being evaluated in skills development/performance areas include: teamwork, respect, and professionalism in performance of skills and interaction with evaluators, team members and simulated patients. Instructors will evaluate affective domain criteria as either satisfactory or unsatisfactory. A student receiving any unsatisfactory rating will be required to meet with his/her advisor and the Medical Director to develop a corrective action plan.

Advisor Reviews
Each semester, students will meet with their respective advisor to review progress (see related policy). During this review, the advisor will discuss additional affective domain criteria that has been observed. Affective domain areas that are discussed in these reviews include, but are not limited to: integrity/honesty, self-motivation, communication (written and verbal), and judgment/decision-making development. Instructors will evaluate affective domain criteria as either satisfactory or unsatisfactory. For a student receiving any unsatisfactory rating during these reviews, the Medical Director will have input regarding a corrective plan of action that will be conveyed to the student.

Clinical/Field Internship Performance:
Each evaluation form that is filled out by a preceptor has line items addressing affective domain. Affective areas that are evaluated in the Clinical/Field Internship areas include, but are not limited to: teamwork, respect, empathy, patient advocacy, time management, professionalism in communication, and delivery of service. Additionally, student advisors will monitor and use the following point system. As with the classroom environment, the student will begin with a total of 100 points. When a score drops below 80 points at any time in the certificate program, the
student will be required to meet with his/her advisor and the Medical Director to develop a corrective action plan.

- Unexcused Absence for any portion of shift 5.0 pts
- Unacceptable Failure to Call Off Properly 5.0 pts
- Late submission of the clinical / field paperwork 2.5 pts
- Violations of Clinical/Field Behavioral Items 5.0 pts
- Violations of Clinical/Field Dress Code 2.5 pts
- Violations of any other Classroom Behavioral Items 5.0 pts
- Any substantiated “Unsatisfactory” affective rating from preceptors 5.0 pts

Following any meeting with the advisor and Medical Director, any further drop in affective scoring will result in dismissal from the program. A student who has at least 80% on both the classroom and clinical/field components, and has no unsatisfactory ratings, or does not continue to acquire unsatisfactory ratings in any affective domain area following an advisor/Medical Director meeting, shall be given a grade of “Pass” at the end of the Certificate Program.

A student shall not be utilized as a substitute for regular staffing and shall not be regularly delegated to such tasks. It is expected that students will assist with cleaning and other tasks that are a part of patient care or readiness for new patients. However, they are not to be delegated these types of tasks while educational patient care opportunities exist. Students should not be used as transporters, taking them out of a learning environment. For more information, please review EMT Clinical Addendum.

**Grades Below 80%**

When a student’s GPA falls below 80%, the student is encouraged to seek assistance from his/her advisor. The advisor may tutor the student and may assign tasks or projects intended to assist the student in learning the course material. Any additional tasks or projects established during the tutorial process will not be factored into the student’s grade, and therefore will not affect the student’s GPA. The only opportunity students have to return the GPA to an 80% is through any remaining quizzes, assignments/projects that all class members are required to complete, or exams.

**Final Comprehensive Evaluations**

In the final segment of the certificate program, following the completion of the Basic EMT course, the student will be required to successfully complete both a comprehensive skills evaluation, and a comprehensive written examination.

The comprehensive skills exam will be an examination of selected “end-of-the-curriculum” skills. To be eligible for the skills exam, a student must have successfully completed all required skills performance expectations to that point. The format of this final comprehensive skills exam will be the same as with the previous semester skills exams. Students are given a total of two attempts to successfully perform each skill. Following the initial test, if a skill needs to be tested a second time, the student must complete a remediation session prior to any retest attempt. To complete the Basic EMT Certificate Program and to be eligible for the National Registry Examination, the student must successfully complete this final comprehensive skills exam.
The comprehensive final written exam will follow the similar format as the comprehensive semester exams. To be eligible for the final comprehensive written exam, a student must have successfully completed all academic requirements to that point. The following are specific policies pertaining to this examination:

- All prior academic grades no longer are factored into the final outcome
- The final exam will be divided into subsections
- A minimum score of 80% on each subsection of this exam is required in order to successfully complete the Basic EMT Certificate Program
- Remediation is mandatory if an 80% is not obtained in every section. Following remediation, the student is given one opportunity to retest any section in which an 80% is not obtained on the first attempt. Retest questions may or may not be the same. Failure to successfully obtain the required minimum of 80% in each section on the retest will result in failure of the Basic EMT Certificate Program.

Program Completion/Certification Information

EMT-B Certificate Program Completion
To successfully complete this program and establish eligibility for the certification examination, students must:

- Successfully complete all applicable classroom, academic, clinical, field internship and attendance requirements
- Complete and document all applicable clinical requirements
- Demonstrate skills competence as required in the laboratory, clinical, and field settings
- Demonstrate overall cognitive, psychomotor, and affective competence to the satisfaction of the faculty, clinical and field internship preceptors, Program Director, and Medical Director
- Not be under investigation or subject to disciplinary action for violation of The University of Toledo rules, regulations or policies, and not have any outstanding balance on his or her student account
- Return any books, equipment, and other materials borrowed from The University of Toledo

Eligibility for Certification
Successful completion of this educational program, or any other EMS program, does not guarantee eligibility for national registration, state certification or licensure. A student with a criminal background may be excluded from the testing or certification process. Denial of testing or certification privileges is a National Registry and State of Ohio issue and it is the student’s responsibility to ensure eligibility. A student having questions or concerns about eligibility should contact the Ohio Department of Public Safety’s Division of EMS at (800) 233-0785, or the National Registry of EMT’s at (614) 888-4484.

National Registry Certification
Following completion of all course requirements and verification by the Program Director and Medical Director and providing the student has no legal hindrance with regards to the National
Registry’s examination criteria, the student will be eligible to take the appropriate National Registry written examinations. NREMT skills testing will take place in class, prior to the end of the semester.

The psychomotor exam will be arranged by The University of Toledo, and it will be conducted on the University of Toledo campus, if possible. Specific details of the National Registry’s testing and retesting policies can be found on the National Registry website (www.nremt.org). The faculty will also discuss these policies with students as that time approaches. If a student is unable to attend the psychomotor testing on the scheduled days at The University of Toledo, or if the student needs to retest skills on another day and at another location, that student shall bear all costs associated with travel and testing fees.

The written (cognitive) exam may not be completed until all program requirements have been satisfied. The program and faculty will provide instructions for the students regarding how to set up a National Registry account and register for the cognitive exam. However, it will be the responsibility of the student to complete the appropriate steps to take the examination. Students are responsible for costs of NREMT testing. Faculty must be notified of the passing results to facilitate state certification.

**National Registry Testing Accommodations**
The National Registry will make accommodations for the cognitive examination in certain circumstances. However, specific documentation is required. If a student feels that he/she needs special testing accommodations for the National Registry examination, that student must directly contact the National Registry of EMT’s to discuss the paperwork requirements at (614) 888-4484. The student also bears all fees associated with testing. We encourage any student to contact the National Registry several months in advance of the anticipated test date.

**State Certification**
After becoming nationally registered, the student must complete an application for the Ohio Division of EMS to obtain the appropriate State certification. The Program Director and faculty will provide the necessary instructions in how to complete these tasks. A person MUST be state-certified as an EMT-B prior to representing himself or herself to an employer as a EMT-B. National Registry certification is not sufficient to function as a Basic EMT. **State certification is required.**

**Reciprocity with Other States**
Requirements for EMS certification or licensure vary significantly from state to state. Students who anticipate wishing to practice in another state must contact the agency responsible for credentialing EMS personnel in that state to obtain information regarding requirements for reciprocity. In most cases, that state will not allow you to practice within their boundaries until reciprocity requirements have been met.
