GRADUATE MEDICAL EDUCATION

AT THE UNIVERSITY OF TOLEDO

CHANGING LIVES

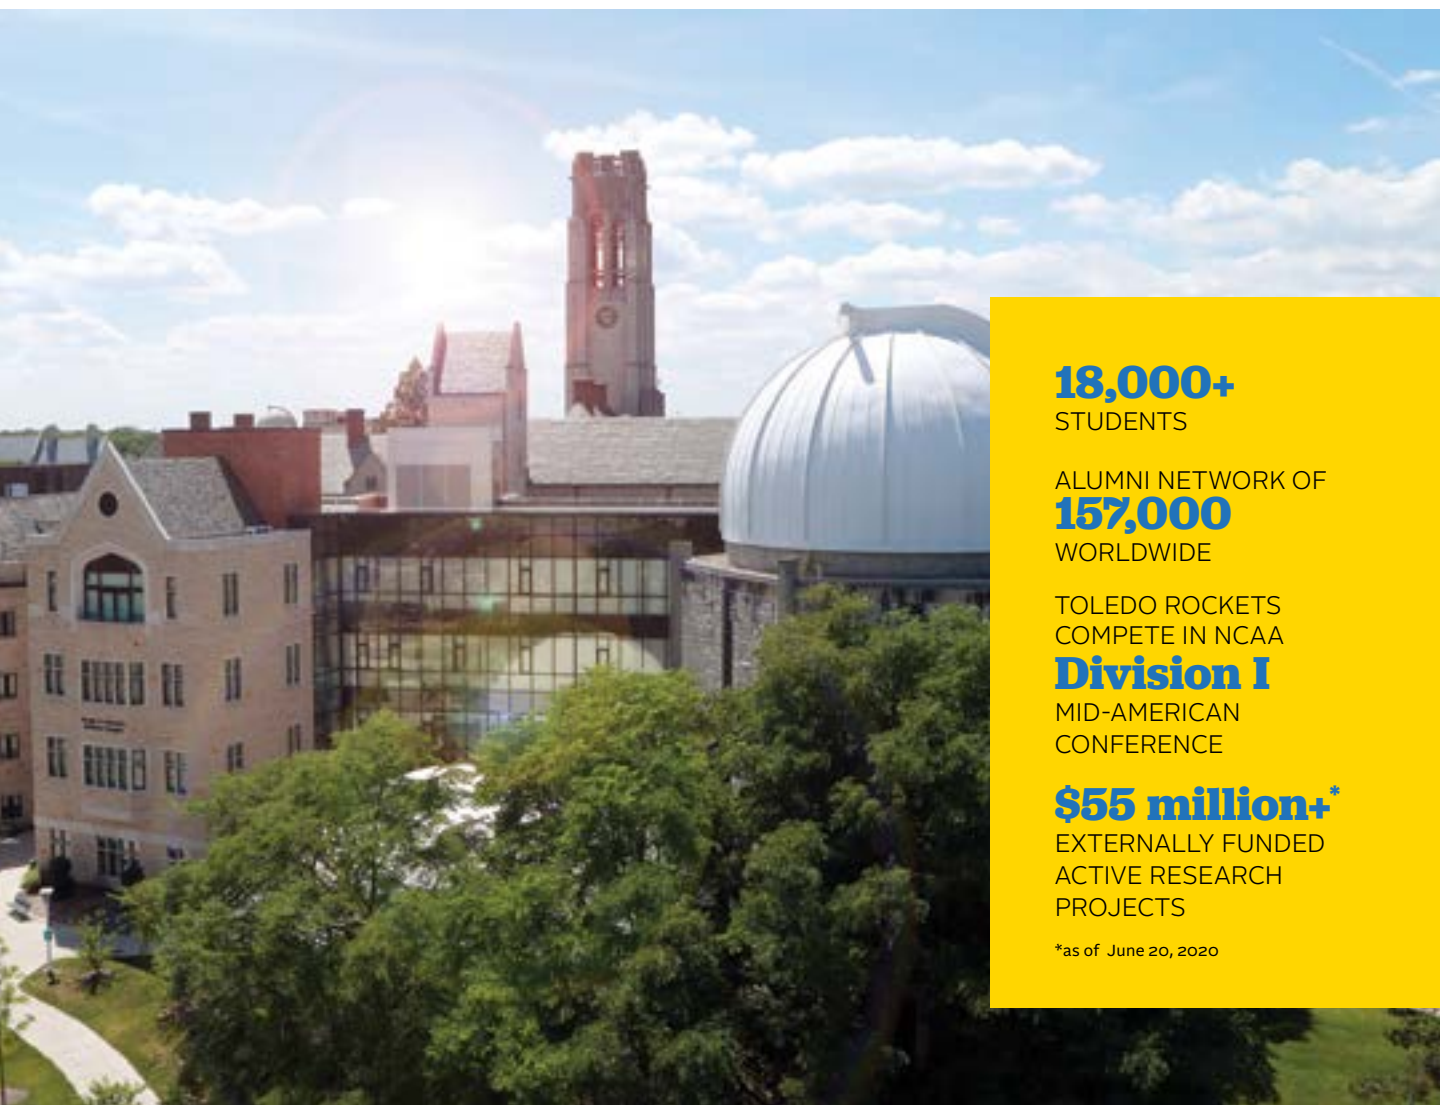

At The University of Toledo, you'll find world-class education and research opportunities in a supportive medical community that fosters ongoing professional growth and development, as well as investment in community wellness. Our Academic Affiliation with ProMedica provides access to a wide scope of clinical environments and experiences.

Those who make their home in the Toledo region enjoy a community featuring urban innovation, a vibrant downtown, cultural and entertainment activities, lifelong education opportunities, family-friendly neighborhoods and a strong Midwestern spirit of hard work, inclusion and opportunity.

Graduate medical education at The University of Toledo is a life-changing experience with opportunity for career-building success. Explore our academic programs and clinical facilities to see the possibilities in your future.

THE UNIVERSITY OF TOLEDO

The University of Toledo is a comprehensive, public research university. Established in 1872, the University offers 272 undergraduate, graduate and professional programs in the arts, natural sciences, health sciences, education, engineering, business and law. Students enjoy technologically advanced learning facilities on two campuses, the historic Main Campus and the Health Science Campus, as well as ancillary facilities to support research and scholarly activity that include the Lake Erie Center, the Stranahan Arboretum and the Frank Gehry-designed Center for Visual Arts at the Toledo Museum of Art.

BUILDING A LEGACY

The College of Medicine's Academic Affiliation with ProMedica is developing the next generation of medicine.

In 2015, the College of Medicine and Life Sciences formed an Academic Affiliation with ProMedica, the Toledo region's largest health system and now one of the largest health systems in the nation. The Affiliation is a 50-year agreement and represents a \$2.5 billion investment in developing a legacy model of healthcare and medical education in Toledo. How are we doing it?

- **Creating a premier academic medical center:** Students, residents and fellows in The University of Toledo College of Medicine and Life Sciences now do the bulk of their clinical training at ProMedica Toledo and Russell J. Ebeid Children's Hospitals. Recently named one of the 50 best hospitals in the nation by HealthGrades, ProMedica Toledo Hospital serves as the hub of medical education in Toledo with a growing research and innovation portfolio. In 2019, ProMedica celebrated the grand opening of Generations Tower, a transformative, 13-story, patient-care tower at the hospital. The size and scope of ProMedica Toledo Hospital has made it a destination for patients and provides you access to a growing volume of high-acuity cases across a broad range of sub-specialties throughout your training.
- **Attracting and retaining top talent:** Since becoming partners, the College of Medicine and Life Sciences and ProMedica have worked to recruit new specialists, department chairs and researchers to Toledo. These faculty have joined the University because of the expanding opportunities to pursue discovery and provide leadership in a growing academic medical center.
- **New research:** The unique partnership between the College of Medicine and Life Sciences and ProMedica presents new opportunities for you to learn from experts in specialized fields and participate in research, including clinical trials, throughout your residency or fellowship.

About ProMedica

ProMedica is redefining healthcare locally, regionally and nationally. Healthcare no longer exists only inside the four walls of a hospital or a doctor's office. Healthcare is caring for a family's well-being, serving our communities at their core and helping our neighbors become healthier. This philosophy of care is well-aligned with the College of Medicine and Life Sciences mission to improve the health of the communities we serve.

Aside from its unique Affiliation with the College of Medicine and Life Sciences, ProMedica is a national pioneer and leader in understanding and addressing the social determinants of health to help connect patients with resources to improve socioeconomic factors, physical environment, health behaviors and access to quality care beyond a physician's office or hospital. And the health system's 2018 acquisition of HCR Manor Care, the nation's second-largest post-acute and long-term care provider, expands the system's reach, scope and influence into 30 states around the country.

EXPANDING EXPERIENCE

Interprofessional Immersive Simulation Center

The IISC is the University's tri-center learning hub, providing unprecedented experiential and experimental opportunities for interprofessional and interdisciplinary collaboration between healthcare professionals and those with expertise in areas such as innovation, engineering and biotechnology.

Practice surgical skills, visualize medical conditions and anatomy in virtual immersive reality, work with standardized patients or test your proficiency by responding to simulated scenarios. The IISC allows you to leave the clinical environment and practice in a safe space to continue expanding your skills. The center is used not only by University students, residents and fellows, but also by healthcare practitioners across the region for training and professional development.

You also can engage with researchers at the IISC. The center is a hub of interdisciplinary research, facilitating collaborations with the University's colleges of Medicine, Engineering, Natural Sciences and Mathematics, Health and Human Services, Law, and Business and Innovation.

Interprofessional Education Program

Healthcare professionals from varying disciplines interact at the patient's bedside every day, so at The University of Toledo we prepare students from all health professions to interact with each other to provide patient care. Undergraduate, graduate and professional students work in teams to foster greater communication and respect, improve patient safety and encourage patients' engagement with their healthcare team.

The University of Toledo's interprofessional education program includes students from across the University who are studying medicine, clinical psychology, nursing, occupational therapy, pharmacy, physical therapy, physician assistant, public health, respiratory therapy, speech-language pathology and social work.

Biomedical Research

The University of Toledo and the College of Medicine and Life Sciences are committed to growing biomedical research and making an impact through the new knowledge our researchers contribute through their work. The University has more than \$50 million in research funded by the National Science Foundation, the National Institutes of Health and other external sources.

As a resident or fellow, you will have the opportunity to participate in research, present at scholastic conferences and contribute to peer-reviewed publications.

FINDING HOME

It matters where you choose to build your life and career. We know you'll feel at home in Toledo.

Toledo is a diverse, inclusive community that celebrates tradition, embraces new ideas and welcomes new people. We are creating opportunities for future generations, thanks to a rising class of innovators and makers who are propelling big ideas from concept to reality.

Importantly, Toledo is home — for students, young professionals, experienced executives, families just starting out and families who have lived here for generations. Our region has a strong commitment to education, from pre-K through postdoctoral. We offer a mix of neighborhoods featuring affordable costs of living to suit your lifestyle and minimal commute times to ensure you have free time to enjoy all the features the area has to offer.

You can cheer year-round for The University of Toledo Rockets in any of 15 varsity sports, as well as Toledo's minor league hockey and baseball teams. Our community is home to the nationally recognized Toledo Zoo and Aquarium and the internationally renowned Toledo Museum of Art. You also can enjoy the outdoors with miles of shoreline along the Maumee River and Lake Erie, 14 metroparks with 120 miles of trails, and public and private golf courses. U.S. News & World Report has ranked Toledo one of the top two places to live in Ohio for outdoor fun.

GETTING STARTED

The University of Toledo College of Medicine and Life Sciences participates in the National Resident Matching Program and accepts applications through the Electronic Residency Application Service (ERAS). The University is not able to offer residency positions outside of the match.

All candidates must be willing and able to participate in virtual interviews for the 2020-21 interview/match cycle. Candidates who match with The University of Toledo are expected to attend an orientation that begins the week prior to July 1.

To learn more about applying to our programs, please visit utoledo.edu/med/gme.
