

Launch of the new clinical curriculum

Rocket Medicine Phase 2 ■ May 2, 2022

Our Guiding Principles

- Students add value to patient care .
- Equity and inclusion will inform all aspects of our educational endeavors.
- Integration facilitates meaningful clinical learning.

The University of Toledo Rocket Medicine Curriculum Reform is heading into Phase 2 of implementation. The key changes and additions to the new clinical curriculum are highlighted below.

New Clinical Performance Assessments

- Fair, objective and easy-to-access clinical competency evaluations
- New approach to grading that allows for distinctions in grades based on your clinical performance

Dedicated Time for Career Exploration

- Scheduled career exploration and advising activities to guide you towards your chosen specialty

Health Equity and Antiracism Content

- Workshops focused on addressing implicit bias in healthcare, increasing access to care and encouraging diverse representation in medicine

Build Clinical Reasoning Skills

- Clerkship learning and assessments based on knowledge integration that will foster the development of clinical reasoning

Professional Identity Formation

- Dedicated time for developing your professional identity and enhancing your well-being

Integrated Clinical Learning

- Sequentially connected and thematically linked clerkship experiences and educational activities
