

We have 2 Technologist positions available in our Analytical Services lab. We typically look for a Bachelors in Chemistry or Biology, with a minor in Chemistry. This is an entry level, get your foot in the door position for someone who has just graduated typically. Are you able to email your newly graduated students this information?

We also have a Chemist position available. The requirements are to have around 3 years of industry experience. Are you able to email students who have graduated?

The links to apply are below. Graduates are more than welcome to reach out to me directly or email me their resume. Let me know if you have any questions. Thank you,
