

Science Day Announcement for 2021

In an effort to help plan for the 2020-2021 school year, and assist teachers and parents with an opportunity that allows their students to be recognized for their scientific research or engineering accomplishments, the Ohio Academy of Science is announcing cohesive, specific plan that provides a rigorous and safe way for this to happen.

New for 2021, students will not have to qualify for a Virtual District Science Day by participating in a local or independent science fair. Rather, any student who completes a project will be able to register directly into the Virtual District Science Day for the opportunity to advance to State Science Day, Virtual 2.0. Specifically, this will reduce the pressure and need to host a local fair in these very uncertain times.

Here are links for [more information](#) that includes [timelines](#) for both the District Science Day, State Science Day, and the Buckeye Science and Engineering Fair.

More specific details about project requirements and presentation formats are being finalized and will be disseminated on or about September 15, 2020. We are using the recommendations provided during the State Science Day survey that was recently conducted. Thank you if you took the time to participate and for offering ways to improve the Science Day program!

Please look for announcements that will include webinars and other tools to assist your efforts this school year.

Kind regards,

Michael Woytek
Executive Director
The Ohio Academy of Science
