

2018 FALL MEETING

# Ohio-Region Section of the American Physical Society

FRIDAY AND SATURDAY, SEPTEMBER 28-29, 2018

THE UNIVERSITY OF TOLEDO  
Toledo, Ohio

## *Celebrating Planck's 1918 Nobel Prize in Physics: The Many Implications of Energy Quanta*

Join your colleagues for two days of collaboration, learning and communication at the 2018 fall meeting of the OSAPS at The University of Toledo! Symposia Friday afternoon and Saturday morning will address a wide range of hot topics in physics. Also, please plan to join us Friday evening for the banquet and a subsequent public presentation focusing on the roles of energy quantization in physics and astronomy. These meetings provide an ideal venue for students and science teachers to attend, present their research results and engage in active discussion.

Information about speakers, abstract submission, registration and travel accommodations will be available in June 2018 at:
