

Confirmed Truths and Remaining Mysteries Regarding the Origin of the Universe

The 2014 McMaster Cosmology Lecture

Thursday

Feb 27, 2014

4:00 PM

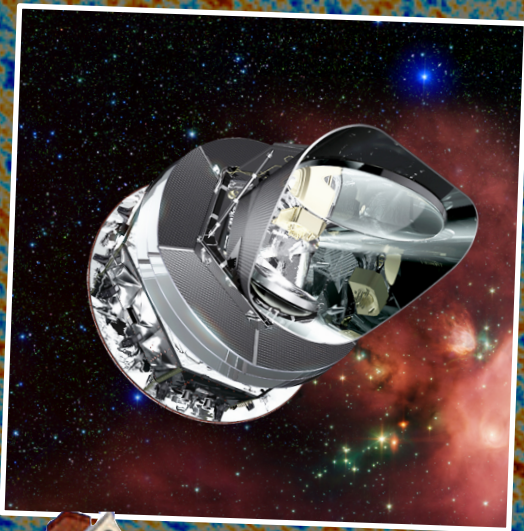

Driscoll Auditorium

Free and open to all

Dr. Lloyd Knox

University of

California Davis

The Universe used to be filled with hot, dense matter, smoothly distributed across a rapidly expanding space. Professor Knox will trace the history of this "big bang" picture of our origins, clarifying its observational successes and highlighting the remaining questions that drive us toward deeper exploration.

Sponsored by the Department of Physics & Astronomy
College of Natural Science & Mathematics
University of Toledo
