

# STUDENT RESOURCE VII: Using field work to verify remotely sensed images

In this exercise, you will walk through your assigned portion of the neighborhood with the most recent remotely sensed image while you do the following:

1. Check the accuracy of the map and make updates on the map to reflect any changes.
2. Report observed changes in the table below.

No. (Mark on map)	Map Location	Changes compared to 2014 map
1.	<i>Example:</i> East side of Putnam, 5th lot south of Machen	House no longer exists
2.		

3. Present your observations to the rest of the class.
