

STUDENT RESOURCE XII: **Challenge 4**

Connecting research to neighborhood change

Imagine you have been asked to serve as a liaison between people who live in the neighborhood and the city's planning department. Your task is to determine how the used green space in the neighborhood has been used in the past, how they are currently using it, and create a proposal for future use of one location.

1. Where applicable, what persistent problems need to be addressed?

2. How do you suggest addressing the problems?

3. Who are the other individuals and agencies who will be involved in solving the problems identified?

4. Create a PowerPoint presentation to provide concrete suggestions to the planning department of your city.
