

Stress versus Anxiety

Everyday Anxiety (Stress)	Anxiety Disorder
In response to a known environmental factor	In response to an unknown source or in response to the experience of stress
Symptoms go away when the stressor goes away	Symptoms remain despite no identifiable stressor
Worry about living away from home for the first time, passing a class, a romantic breakup, or other important life events	Constant and unsubstantiated worry that causes significant distress and interferes with your daily life
Embarrassment or self-consciousness in an uncomfortable or awkward social situation; feeling nervous about meeting new people	Avoidance of social situations due to fear of being judged, embarrassed, or humiliated
Feeling nervous or sweating before a big test, class presentation, stage performance, or other significant event	Panic attacks that seem out of the blue and preoccupation with the fear of having another one
Realistic fear of a dangerous object, place, or situation (e.g. fear of poisonous snakes)	Irrational fear or avoidance of an object, place, or situation that poses little or no threat of danger (e.g. fear of elevators)
Making sure that you are healthy and living in a safe environment	Performing uncontrollable repetitive actions, such as excessive cleaning, checking, touching or arranging
