Our Missions:

University of Toledo-Health Science Campus
The mission of the University of Toledo-Health Science Campus is to improve the human condition through the creation, dissemination and application of knowledge using wisdom and compassion as our guides.

University of Toledo Medical Center
The mission of the University of Toledo Medical Center at the University of Toledo-Health Science Campus is to provide superior patient care which is compassionate and cost effective and to support and enhance the health education of the University of Toledo-Health Science Campus. In partnership with the university, the hospitals continuously strive to develop and incorporate advancements in health-care knowledge to improve the quality of patient care.

Our Values:

- **Discovery**: As an academic health center we vigorously pursue research opportunities to obtain new knowledge for the education of tomorrow’s health-care providers and for the treatment and healing of those in need
- **Education**: We provide the highest level of health education to our students, employees and the community and foster a culture of lifelong learning
- **Compassion**: We treat every individual with the highest level of kindness, dignity and care
- **Respect**: We show consideration for the thoughts and ideas of other inside and outside our institution
- **Integrity**: We will hold ourselves to the highest standards possible and earn the trust and commitment of each other and the communities we serve
- **Diversity**: We are committed to creating an environment that recognizes and welcomes the differences and independent thoughts that each of us possess
- **Excellence**: We always strive for the highest level of quality in everything we do to support our mission of education, research and patient care
- **Health**: We promote the physical and mental well-being of others
- **Safety**: We work to create an environment that protects others from physical and bodily harm
- **Empowerment**: We believe in an environment that fosters personal and professional growth and gives people the necessary freedom to accomplish this
- **Community**: We are a resource for education and health care and a good neighbor to others
